PRODUCT FEATURES

FEATURES AND BENEFITS

Features		Benefit
Capability	32 bit RISC Processor with an advanced IGBT power switching technology	Advanced sensorless vector control, providing a powerful starting torque at low frequency with high performance operation at the highest efficiency.
	Output frequency range is 0-650Hz	
	Power range: 200V 0.4~15kW (0.5HP~20HP) 400V 0.75~18.5kW (1HP~25HP)	
H/W Function	The latest generation of IGBT power module	New generation of IPM/ PIM power module can reach higher efficiency of switching and compact design of inverters.
	With 7-segment *5 display panel	From this information, users can be easy to understand the usage state of inverters.
	Standard built-in VR knob	Directly frequency setting and simple to adjust speed
	Built-in EMC filter in compliance with IEC/ EN 61800-3 & 61800-5-1	Lower electromagnetic interference effectively
	Fan control (set by parameter)	Fan control is based on the ambient temperature of key components to lower noise and avoid unnecessary energy wasted.
S/W Function	Soft-PWM modulation	Reduce audible motor noise at low carrier frequency
	Integrated safety stop and fire mode functions	Provide advanced application functions under the circumstance of emergency or fire.
	Auto carrier frequency switching	Built-in sensors detection on operation temperature to avoid the probability of inverter tripping in too high temperature.
	Built-in PID controller	Provide constant control requirements of frequency, pressure, flow, air volume in applications, such as HVAC
	Built-in PLC function	Simple process control to save the cost of external PLC
Expansion Flexibility	Built-in Modbus Communication (RS485)	Fast parameters copying to reduce time of installation, maintenance and replacement.
	PC-software/ Copy unit	
Quality	External cooling heatsink	Reduce the possibility of unknown objects entering to avoid damaging components and improve product reliability.

APPLICATIONS

- Textiles
- Woodworking
- Small Handling Machine
- Simple Metal Processing
- Machine Tools
- Packaging & Labeling
- Food processing
- Fans & Pumps
- HVAC

WIRING DIAGRAM

Single-phase/ Three-phase

*1: When using function of safe input, the terminal SF-SG requires short circuit and inverter will stop output at once.

*2: Power input terminal is L1, L2, L3 in 200V 7.5HP~20HP/ 400V 7.5HP~25HP.

GENERAL SPECIFICATIONS

Item		E510
Control Mode		V/F Control, Vector Control
Frequency	Output Frequency	0.01~650.00Hz
	Starting Torque	150%/1Hz(Vector)
	Speed Control Range	1:50
	Setting Resolution	Digital input: 0.01Hz Analog input:0.06Hz/60Hz
	Setting	Keypad: Set directly with▲▼ keys or the VR on the keypad External Input Terminlas: AI1(0/2~10V), AI2(0/4~20mA)input Multifunction input up/down function(Group3) Setting frequency by communication method.
	Frequency Limit	Lower and upper frequency limits 3 jump frequency settings.
Run	Operation Set	Keypad run, stop button
		External terminals: Multi- operation-mode2 / 3 wire selection Jog operation
		Run signal by communication method.
Main Control Features	V/F Curve Setting	18 fixed curves and one customized curve
	Carrier Frequency	1~16KHz
	Acceleration and Deceleration Control	2 sections of acceleration/ deceleration time setting (0.1~3600.0 Sec.) 4 sections of S curve setting
	Multifunction Input	29 functions (refer to group 3 in the manual)
	Multifunction Output	20 functions (r refer to group 3 in the manual)
	Multifunction Analog Output	5 functions (refer to n group 3 in the manual)
	Main Features	Overload Detection,16 preset speeds, Auto-run, Acc/Dec Switch, Main/Alt Run Command Select, Main/Alt Frequency Command Select ,PID control, Torque Compensation, V/F Start Frequency, Slip Compensation, Fault Reset.
Display	LED	Display: parameter / parameter value / frequency / line speed / DC voltage / output voltage / output current / PID feedback / input and output terminal status / Heat sink temperature / Program version / Fault Log.
	LED Status Indicator	Run / Stop / Forward / Reverse ,and etc.
Protective Functions	Overload Protection	The relays to protect the motor and the inverter. (150%/1min)
	Over Voltage	200V class: >410V , 400V class: >820V
	Under Voltage	200V class: <190V , 400V class: <380V
	Momentary Power Loss Restart	Inverter auto-restart after a momentary power loss.
	Stall Prevention	Stall prevention for Acceleration/ Deceleration/ Operation.
	Short-circuit Output Terminal	Electronic Circuit Protection
	Grounding Fault	Electronic Circuit Protection
	Other Protection Functions	Protection for overheating of heat sink, the carrier frequency decreasing with the temperature function, fault output, reverse prohibit, prohibit for direct start after power up and error recovery ,parameter lock up
All frames include brake transistor		
Communication control		Standard built-in RS485 communication (Modbus), One to one or One to many control.
Environment	Operating temperature	-10~50°C (without dustproof cover/ paster) -10~40°C (with dustproof cover/ paster)
	Storage temperature	-20~60°C
	Humidity	95% RH or less (no condensation)(Compliance with IEC 60068 - 2-78)
	Shock	1.0G, in compliance with IEC 60068-2-6
	Enclosure	IP20
