Series 10 Single Phase Aluminium 71 – 100

The Brook Crompton Series 10 single phase motor range offers products with outputs from 0.25kW to 3.0kW in frame sizes 71 to 100.

They are used on a wide range of applications from pumps to conveyors.

Many applications often have adverse operating conditions including repeated starting and occasional overloading; the Series 10 Aluminium range is well suited to these situations.

A virtual go anywhere motor, incorporating the use of an electronic relay switch rather than the outdated centrifugal flying switch.

- 0.25kW – 3.0kW
- Capacitor Start Capacitor Run
- IP55 - (Optional IP56, IP65, IP66)
- B3, B5, B35, B14 & B34
- Insulation Class F
- Multimount Feet
- 2 & 4 Pole
- Steel Fan Cowl
- Metal Terminal Box
- Compact Design
